Index of Authors

- | | | | |
|---------------------------------|--|----------------------------------|-------------------------------|
| Abad-Alegria, Francisco,
116 | Fernandez, Thalia, 165 | Khoshbin, Shahram, 63 | Ribiero, Marcia, 192 |
| Aguirre Portillo, L. E., 175 | Fernandez-Bouzas,
Antonio, 165 | Kikuchi, Mitsuru, 109, 170 | Ricardo, Josefina, 165 |
| Akman, Cigdem Inan, 207 | Fernandez Harmony, T., 175 | Knott, V., 145 | Riestra Castineda, R., 175 |
| Amiguet, Juan Antonio, 116 | Fino, John J., 94 | Kojan, Suleiman, 138 | Rosenfeld, J. Peter, 7 |
| Aubert, Eduardo, 165 | Fonseca, Lineu C., 71 | Kong, Jian, 160 | Ruiz Sandoval, J. L., 175 |
| Aznar-Bueno, Cristina, 116 | Goelz, Hansjerg, 181 | Koshino, Yoshifumi, 109,
170 | Santiago, Efrain, 165 |
| Barlas, Meral, 201 | Gokyigit, Ayşen, 157, 201 | Labelle, A., 145 | Schubert, Romaine, 207 |
| Baykan, Betül, 157, 201 | Gómez Limón, E., 175 | Mahoney, C., 145 | Shang, Hongyan, 160 |
| Black, Michael A., 122 | Gómez-Velázquez, F. R.,
175 | Matricardi, Maria, 76 | Silva-Pereyra, Juan, 165 |
| Bones, Philip J., 181 | González Cornejo, S., 175 | Meulstee, J., 104 | Soto Mancilla, J. L., 175 |
| Bosch, Jorge, 165 | González-Garrido, A. A., 175 | Moore, Norman C., No. 1,
V, 1 | Stam, C. J., 104 |
| Boutros, Nashaat N., 67 | Gruzelier, John 23 | Mutombo Lukusa, V., 196 | Sterman, M. Barry, 45 |
| Brincio, Mario, 76 | Guidetti, Vincenzo, 76 | Nanbu, Yuko, 109, 170 | Struve, Frederick A., 88, 141 |
| Calışkan, Ahmet, 201 | Gürses, Candon, 157, 201 | Nash, John K., 30 | Tedrus, Gloria M.A.S., 71 |
| Carroll, Grant J., 122 | Harmony, Talia, 165 | Niedermeyer, E., 153, 192 | Thatcher, Robert W., 38 |
| Casián, Gustavo, 165 | Hashimoto, Takuma, 109,
170 | Oropeza de Alba, J. L., 175 | Thirstrup, Larry L., 141 |
| Ceja Moreno, H., 175 | Hernández-Ballesteros,
Adriana, 165 | Otero Ojeda, Gloria, 165 | Trudeau, David L., 13 |
| Chorlton, P., 83 | Hessels-van der Leij, E. M.,
104 | Özcan, Hitzi, 201 | Tshaiia Katumbay, D., 196 |
| Díaz-Arrastia, Ramon, 138 | Hughes, John R., 94, 131 | Öztürk, Aylin, 201 | Valdés, Pedro, 165 |
| Dingle, Alison A., 122 | Jones, B., 145 | Parkin, Philip J., 122 | Van Ness, Paul C., 138 |
| DiSabato, Maria Lucia, 76 | Jones, Richard D., 122, 181 | Patrick, Gloria, 88, 141 | Vliegen, J.H.R., 104 |
| Donaldson, Ivan A., 122 | Kane, N., 83 | Pavone, Antonio, 153 | Wada, Yuji, 109, 170 |
| Duffy, Frank H., No. 1, V | | Payne, D. Keith, 141 | Wei, Haifeng, 160 |
| Edebol Eeg-Olofsson, K.,
196 | | Pérez Rulfo, D., 175 | Yang, Xiuzhen, 160 |
| Eraksoy, Mefkure, 201 | | Reeves, Roy R., 141 | Zialcita, Miguel L., 131 |

Index of Subjects

- Absence seizures** and, the frontal lobe, 153-156
 —nonconvulsive status epilepticus, 192-195
 —nose wiping, unrecognized automatism, 157-159
- Abuse** and, domestic violence, EEG evaluation, 60
- Acetylcholine** and, interhemispheric EEG coherence in healthy subjects, 109-115
- Acupuncture, electrical**, and, somatosensory evoked potentials, 160-164
- Addictive disorders** and, brain wave biofeedback, review and future research, 13-22
 —See also Psychoactive substance use
- Affective disorders** and, EEG biofeedback protocol, 7-12
- Age factor** and, coupling between neural networks in the brain, 104-108
 —interhemispheric EEG coherence, 170-174
 —See also Children, Elderly subjects
- AIDS** and, early detection of neurophysiological abnormalities in HIV, 116-121
- Alcohol dependence** and, QEEG as predictor of relapse, 59
- Alpharhythm** and, addictive disorders, with EEG biofeedback, 13-22
 —ADHD, with EEG biofeedback, 30-37
 —affective disorders, with EEG biofeedback, 7-12
 —anxiety disorders, with EEG biofeedback, 1-6
 —EEG biofeedback therapy, editorial, No. 1, V-VIII
 —interhemispheric coherence with normal aging, 170-174
 —interhemispheric coherence with scopolamine, 109-115
 —konzo disorder, 196-200
 —obstructive pulmonary disease, with topographic quantitative analysis, 141-144
 —schizophrenia with clozapine treatment, asymmetry as predictor of response, 145-152
 —seizure disorders, with EEG biofeedback, 45-55
 —seizures vs. syncope in elderly, 131-137
- American Medical Electroencephalographic Association (AMEEGA)** and, brief history, 63-66
- American Psychiatric Electrophysiology Association (APEA)** and, history and mission, with AMEEGA and ECNS, 67-70
- Anoxia** and, differential diagnosis of nonconvulsive status epilepticus, 192-195
- Anxiety disorders** and, review of EEG biofeedback treatment, 1-6
- Asymmetry, amplitude**, and, affective disorders with EEG biofeedback, 7-12
 —schizophrenia, response to clozapine treatment, 145-152
 —schizophrenia, self regulation of electrocortical treatment, 23-29
 —subacute sclerosing panencephalitis, 201-206
- Atonic seizures** and, intractable epilepsy of childhood, treatment with tiagabine, 207-210
- Attention Deficit Hyperactivity Disorder (ADHD)** and, EEG biofeedback, 13-22, 30-37
- Auditory evoked potentials** and, marihuana users, 88-93
 —See also Evoked potentials
- Automatism** and, nose wiping in absence seizures, 157-159
- Benign childhood epilepsy** and, SEP in 385 cases, 71-75
- Beta activity** and, clozapine treatment in schizophrenia, 145-152
 —EEG biofeedback in addictive disorders, 13-22
 —interhemispheric coherence with normal aging, 170-174
 —interhemispheric coherence with scopolamine, 109-115
- Biofeedback, EEG**, and, addictive disorders, review of treatment and suggestions for future research, 13-22
 —affective disorders, protocol, 7-12
 —anxiety disorders, review of treatment, 1-6
 —attention deficit hyperactivity disorder, treatment, 30-37
 —schizophrenia and schizotypy, self regulation of electrocortical activity, 23-29
 —seizure disorders, basic concepts and clinical findings in treatment, 45-55
 —state of EEG biofeedback therapy in 2000, editorial, No. 1, V-VIII
 —traumatic brain injury, 38-44
- Brain infarctions** and, sources of abnormal EEG activity, 165-169
- Brain mapping**, See Topographic mapping, QEEG
- Brain maturation** and, functional coupling between neural networks revealed by omega complexity, 104-108
 —See also Age Factor
- Brain tumor** and, seizures vs. syncope in the elderly, 131-137
- Cardiac disorder** and, seizures vs. syncope in the elderly, 131-137
- Cerebrovascular disorder** and, brain infarctions, sources of abnormal EEG activity, 165-169
 —seizures vs. syncope in the elderly, 131-137
- Children** and, epilepsy and/or migraine, with occipital epileptiform abnormalities, 76-82
 —epilepsy with cognitive impairment during a CPT task, 175-180
 —SEP in 385 cases with seizures, 71-75
 —tiagabine treatment and intractable epilepsy with multifocal spikes, 207-210
 —See also ADHD
- Clinical trial** and, epileptiform activity, real-time detection, 122-130
- Clozapine** and, schizophrenia, EEG hemispheric asymmetry as a predictor of short-term response, 145-152
- Cocaine abusers** and, HIV seropositivity, with EEG, 58-59
 —QEEG predictor of relapse, 59
- Cognitive function** and, absence seizures and the frontal lobe, 153-156

- chronic obstructive pulmonary disease, topographic quantitative analysis of alpha rhythm, 141-144
- cognitive impairment and epileptic children during a CPT task, 175-180
- EEG biofeedback therapy, No. 1, V-VIII, 1-55
- scopolamine effect on EEG coherence in healthy subjects, 109-115
- Coherence, EEG, and, functional coupling between neural networks in the brain**, 104-108
 - normal aging, analysis during rest and photic stimulation, 170-174
 - scopolamine effect in healthy subjects, 109-115
- Complex partial seizures and, nonconvulsive status epilepticus**, 192-195
- Composers and, Mozart effect, distinctive aspects of music, a clue to brain coding?** 94-103
- Continuous performance test and, transitory cognitive impairment in epileptic children**, 175-180
- Delta activity and, brain infarctions**, 165-169
 - interhemispheric EEG coherence with normal aging, 170-174
 - subacute sclerosing panencephalitis, 201-206
 - See also Slow Activity
- Depression and, EEG biofeedback**, 7-12
 - genetically epilepsy-prone rat, 60
- Drowsiness and, meditative state with EEG biofeedback therapy**, No. 1, V-VIII
- Drugs and, addictive disorders and psychoactive substance use, with EEG biofeedback**, 13-22
 - clozapine and schizophrenia, EEG asymmetry as predictor of response, 145-152
 - cocaine abuse and HIV seropositivity with EEG, 58-59
 - marijuana and auditory P50 gating response, 88-93
 - penicillin and Jarisch-Herxheimer reaction with nonconvulsive status epilepticus, 138-140
 - QEEG predictor of relapse in abusers, 59
 - seizures, anticonvulsants and EEG biofeedback, No. 1, V-VIII
 - tiagabine treatment of intractable epilepsy in children with multifocal spikes, 207-210
- Edema and, sources of abnormal EEG activity in brain infarctions**, 165-169
- EEG operant conditioning, See Biofeedback**
- Elderly subjects and, EEG coherence and normal aging**, 170-174
 - seizures vs. syncope, with EEG, 131-137
- Electroencephalography and Clinical Neuroscience Society (ECNS) and, history with AMEEGA and APEA**, 63-70
- Epilepsy, See Seizures**
- Epileptiform activity, See Spikes**
- Evoked potentials and, acupuncture after needling acupoint LI-4**, 160-164
 - auditory P50 in marijuana users, 88-93
- children with seizures, 385 cases, 71-75
- HIV, early detection of neurophysiological abnormalities, P300, 116-121
- Frontal localization and, absence seizures**, 153-156
 - ADHD with EEG biofeedback, 30-37
 - affective disorders with EEG biofeedback, 7-12
 - EEG biofeedback therapy, editorial, No. 1, V-VIII
 - epileptiform discharges in the elderly, 131-137
 - konzo disorder, 196-200
 - marijuana users, 58
- Gamma activity and, EEG biofeedback, schizophrenia**, 23-29
- Gelastic seizures and, hypothalamic hamartoma**, 62
- Gibbs, Frederic A., Erna L., and, history of AMEEGA**, 63-66
- Gold standard and, real-time detection of epileptiform activity**, 122-130
- Grass, Albert, and, history of EEG with Frederic and Erna Gibbs**, 63-66
- "H" response and, headache, with photic stimulation**, 83-87
- Hallucinations and, children with epilepsy and/or migraine and occipital/EEG abnormalities**, 76-82
- Hamartoma, hypothalamic, and gelastic seizures**, 62
- Headache and, children with epilepsy and/or migraine and occipital EEG abnormalities**, 76-82
 - migraine and/or epilepsy, same disease process, 61
 - photic stimulation, 83-87
- History and, ECNS, AMEEGA and APEA**, 63-70
- Human immunodeficiency Virus (HIV) and, neurophysiological abnormalities, early detection**, 116-121
- Infarctions, brain, and, sources of abnormal EEG activity**, 165-169
- Infection and, HIV, early detection of neurophysiological abnormalities**, 116-121
- Ischemic penumbra and, sources of abnormal EEG activity in brain infarctions**, 165-169
- Jarisch-Herxheimer reaction and, nonconvulsive status epilepticus in a patient with neurosyphilis**, 138-140
- Konzo disorder and, EEG findings**, 196-200
- Lennox Gastaut syndrome and, diagnosis of multifocal independent spike syndrome**, 207-210
- Marijuana and, auditory P50 gating response**, 88-93
- Matching pursuit methods and, wavelet analysis**, 181-191
- Measles and, subacute sclerosing panencephalitis**, 201-206
- Memory and, absence seizures and the frontal lobe**, 153-156
 - See also Cognitive function
- Migraine and, children with epilepsy and occipital EEG abnormalities**, 76-82
 - epilepsy, same disease process, 61
 - photic stimulation, 83-87
- Montage and, EEG biofeedback studies**, 7-12
- Motivation and, schizophrenia with self regulation of electrocortical activity**, 23-29
 - See also Biofeedback
- Mozart effect and, distinctive aspects of music, clue to brain coding?** 94-103

- Myelinization** and, age-dependent changes in coupling between neural networks in the brain, 104-108
- Myoclonus** and, subacute sclerosing panencephalitis, clinical stages and EEG findings, 201-206
- Neurosyphilis** and, nonconvulsive status epilepticus with Jarisch-Herxheimer reaction, 138-140
- Neurotherapy**, See Biofeedback
- Nonconvulsive status epilepticus** and, considerations, 192-195
 - Jarisch-Herxheimer reaction in a patient with neurosyphilis, 138-140
- Normative databases** and, EEG biofeedback and traumatic brain injury, 38-44
 - wavelet analysis, 181-191
- Nose wiping** and, unrecognized automatism in absence seizures, 157-159
- Obsessive-compulsive disorder** and, EEG biofeedback treatment, 1-6
- Occipital localization** and, children with epilepsy and/or migraine, 76-82
- Omega complexity** and, functional coupling between neural networks in the brain, 104-108
- Parietal localization** and, SEP in childhood epilepsies, 71-75
- Penicillin therapy** and, nonconvulsive status epilepticus, Jarisch-Herxheimer reaction in patient with neurosyphilis, 138-140
- Peniston protocol** and, EEG biofeedback, 13-22
- Periodic complexes** and, subacute sclerosing panencephalitis, 201-206
- Periodic lateralized epileptiform discharges (PLEDs)** and, subacute sclerosing panencephalitis, 201-206
 - elderly subjects seizures vs. syncope, 131-137
- Periodicity** and, Mozart effect, distinctive aspects of music, a clue to brain coding? 94-103
- Personality disorders** and, addictive disorders, with EEG biofeedback, 13-22
 - ADHD, with EEG biofeedback, 30-37
 - affective disorders, with EEG biofeedback, 7-12
 - anxiety disorders, with EEG biofeedback, 1-6
 - See also Psychoactive substance use
- P50** and, gating response in marihuana users, 88-93
- Phobic anxiety disorder** and, EEG biofeedback treatment, 1-6
- Photic stimulation** and, children with epilepsy and/or migraine, 76-82
 - headache, cerebral response, 83-87
 - healthy subjects, scopolamine effects on EEG coherence, 109-115
 - interhemispheric EEG coherence, 170-174
- Post-traumatic stress disorder** and, EEG biofeedback treatment, 1-6
- Psychiatric disorders** and, APEA history, 67-70
 - depression with EEG biofeedback, 7-12
 - depression in genetically epilepsy-prone rat, 60
- neurology and EEG, 57
- schizophrenia, response to clozapine treatment, 145-152
- schizophrenia and schizotypy, with EEG biofeedback, 23-39
- Psychoactive substance use** and, brain wave biofeedback treatment of addictive disorders, 13-22
 - cocaine abusers and HIV seropositivity, 58-59
 - electrophysiology, 57-59
 - marijuana and theta hyperfrontality, P50, 88-93
 - personality disorder, P300, 57-58
 - QEEG predictor of alcohol, cocaine or opioid dependence, 59
- P300** and, HIV early detection of neurophysiological abnormalities, 116-121
- Pulmonary disease**, chronic obstructive, and alpha rhythm with topographic quantitative analysis, 141-144
- Quantitative EEG (QEEG)** and, addictive disorders, with EEG biofeedback, 13-22
 - ADHD, with EEG biofeedback, 30-37
 - chronic obstructive pulmonary disease, analysis of alpha, 141-144
 - epileptiform activity real-time detection, 122-130
 - prediction of relapse with substance abuse, 59
 - traumatic brain injury, with EEG biofeedback, 38-44
- Schizophrenia** and, clozapine treatment, EEG hemispheric asymmetry as a predictor of short-term response, 145-152
 - self regulation of electrocortical activity, 23-29
- Schizotypy** and, self regulation of electrocortical activity, 23-29
- Scopolamine** and, interhemispheric EEG coherence in healthy subjects, 109-115
- Seizures** and, absence and frontal lobe, 153-156
 - absence and nose wiping automatism, 157-159
 - benign childhood epilepsy, SEP in 385 cases, 71-75
 - depression in genetically epilepsy-prone rat, 60
 - EEG operant conditioning treatment, 45-55, No. 1, V-VIII
 - elderly, seizures vs. syncope, 131-137
 - history of AMEEGA, 63-66
 - hypothalamic hamartoma, gelastic seizures, 62
 - migraine in children, 76-82
 - nonconvulsive status epilepticus, considerations, 192-195
 - nonconvulsive status epilepticus, Jarisch-Herxheimer reaction, 138-140
 - subacute sclerosing panencephalitis, 201-206
 - tiagabine treatment of childhood intractable seizures, multifocal spikes, 207-210
 - transitory cognitive impairment in children during CPT task, 175-180
- Sensory gating** and, marihuana users, P50, 88-93
- Sleep** and, epileptiform discharges in the elderly, 131-137
- Slow activity** and, addictive disorders, with EEG biofeedback, 13-22

- ADHD, with EEG biofeedback, 30-37
- anxiety disorders, with EEG biofeedback, 1-6
- brain infarctions, 165-169
- chronic obstructive pulmonary disease, 141-144
- EEG biofeedback therapy, editorial, No. 1, V-VIII
- interhemispheric coherence with normal aging, 170-174
- interhemispheric coherence with scopolamine, 109-115
- konzo disorder, 196-200
- marijuana with hyperfrontality P50, 58
- schizophrenia with clozapine treatment, 145-152
- schizophrenia with EEG biofeedback, 23-29
- seizures vs. syncope in elderly, 131-137
- subacute sclerosing panencephalitis, 201-206
- Somatosensory evoked potentials** and, acupuncture after needling acupoint LI-4, 160-164
- children with seizures, 385 cases, 71-75
- See also Evoked potentials
- Source analysis** and, abnormal EEG activity in brain infarctions, 165-169
- Spastic para/tetraparesis** and, konzo disorder with EEG findings, 196-200
- Spike and wave discharges** and, absence seizures and the frontal lobe, 153-156
 - nonconvulsive status epilepticus, 192-195
 - nose wiping automatism, 157-159
 - subacute sclerosing panencephalitis, 201-206
- Spikes** and, epileptiform activity with transient cognitive impairment in children during CPT task, 175-180
 - epileptiform discharges in elderly, 131-137
 - multifocal independent spikes in intractable epilepsy of childhood, tiagabine treatment, 207-210
 - nonconvulsive status epilepticus, considerations, 192-195
 - nonconvulsive status epilepticus with Jarisch-Herxheimer reaction in neurosyphilis, 138-140
 - occipital, children and adolescents with epilepsy and/or migraine, 76-82
 - real-time detection, blinded clinical trial, 122-130
 - subacute sclerosing panencephalitis, 201-206
 - wavelet signal analysis, 181-191
- Status epilepticus** and, considerations of nonconvulsive status epilepticus, 192-195
 - Jarisch-Herxheimer reaction, nonconvulsive, 138-140
- Stroke** and, sources of abnormal EEG activity in brain infarctions, 165-169
 - seizures vs. syncope in elderly, 131-137
- Subacute sclerosing panencephalitis** and, clinical stages and EEG findings, 201-206
- Substance abuse**, See Psychoactive substance use
- Syncope** and, seizures in the elderly, 131-137
- Temporal localization** and, epileptiform discharges in the elderly, 131-137
- Tetrahydrocannabinol** and, auditory P50 gating response, 88-93
- Theta activity** and, addictive disorders with EEG biofeedback, 13-22
 - ADHD with EEG biofeedback, 30-37
 - anxiety disorders and EEG biofeedback, 1-6
 - brain infarctions, 165-169
 - EEG biofeedback therapy, editorial, No. 1, V-VIII
 - interhemispheric coherence with scopolamine, 109-115
 - konzo disorder, 196-200
 - marijuana users, hyperfrontality and P50, 58
 - normal aging, EEG coherence, 170-174
 - schizophrenia and clozapine treatment, asymmetry, 145-152
 - schizophrenia and EEG biofeedback, 23-29
 - See also Slow activity
- Three/second spike and wave discharges** and, absence seizures and the frontal lobe, 153-156
 - nose wiping automatism, 157-159
- Tiagabine** and, intractable epilepsy of childhood with multifocal spikes, 207-210
- Topographic mapping** and, alpha rhythm in chronic obstructive pulmonary disease, 141-144
 - epileptiform activity, real-time detection, 122-130
 - SEP and electrical acupuncture at LI-4, 160-164
 - See also QEEG
- Traumatic brain injury** and, EEG biofeedback, 38-44
 - psychoactive substance use disorder, 13-22
- Vagal nerve stimulation** and, new treatment for CNS disorders, 60-61
- Visual symptoms** and, children with epilepsy and/or migraine with occipital EEG abnormalities, 76-82
- Visual system** and, interhemispheric EEG coherence in normal aging, 170-174
 - scopolamine effect on coherence in healthy subjects, 109-115
 - stimuli, near sensory threshold detection, 62
- Wavelet analysis** and, biomedical signals detection of epileptiform activity, 181-191
